## UT505 SERIES

### Handheld Insulation Resistance Testers

UT505 series handheld true RMS insulation resistance testers combine features of a digital multimeter and insulation resistance tester. Aside from the typical multimeter functions, these meters can also measure insulation resistance, PI, DAR, and automatically calculate resistance ratio to determine the insulation status. UT505 can be used in insulation resistance testing of precision tools, including motors, cables, transformers, switches, electrical appliances and insulated materials.

- True RMS/analog bar graph
- DARPI/timing measurement
- Comparison measurement
- Auto fuse check (UT505B)
- High voltage output alarm
- Auto discharge
- Continuity buzzer
- 99-group data storage
- Step voltage
- Auto range/auto power off
- LCD backlight/data hold
- Low battery indication
